

# RECYCLE A TWEET

THE WORLD'S FIRST RECYCLABLE AND REFUNDABLE TWEET.

**Each year 8 billion bottles and cans trash our beaches, rivers and ocean killing precious Australian wildlife and marine life.**

**Recycling deposit refunds has been a proven solution around the world, but still faces strong opposition in Australia from beverage companies.**

A national scheme for Australia will soon be under review with the key decision

maker being Premier Barry O'Farrell. We needed to prove the recycling power of a 'Cash for Containers' scheme whilst calling on Barry O'Farrell to make the needed change.

So we created the world's first recyclable and refundable tweet. A tweet calling on Barry O'Farrell to implement the Cash for Containers scheme and encouraging the public to recycle the tweet by re-tweeting it.

Every re-tweet can be refunded the same deposit amount as a standard beverage container, one shiny Australian 10 cent piece.

**Support the call for a Cash for Containers scheme by recycling our tweet at [recycleatweet.com](http://recycleatweet.com).**
