

# NO ONE HAS A DEEPER UNDERSTANDING OF SUBMARINE MAINTENANCE.

ASC West is already a respected base for submarine maintenance. Our workforce has grown to more than 350 since 2008 and our facilities are state of the art. From 2016 we will be supporting five submarines in WA, working closely with the Navy, ASC in South Australia and our national supplier base. We have also been an integral part of submariner training in Western Australia since 1992. In short, we know subs from top to bottom. To see what we do in more depth visit our web site.
